

## Viola Calibration Scales

### **Performance Instructions**

- Play all scales very evenly and smoothly, without any accents; do not get quieter or louder at the ends of notes
- Especially when the note is followed by a rest, play the full value of every note, right up until the next beat
- Do not use vibrato
- Start each scale on the open string, and then stay on the string for the full scale; for each scale, only change positions - not strings
- To clarify the dynamic markings in the score ('p' and 'f'), please test what is the absolute softest and the absolute loudest you are able to sustain on your instrument. If those two extreme dynamics are 'pp' and 'ff' respectively, then between those two dynamics you will be able to establish what for you and your instrument constitutes four more dynamics: 'p mp mf f'.  
Notated in the music, the scales are each to be played 'p' and 'f', and based on the 6-step dynamic range you established using the guidelines given above

### **Recording Instructions**

- Produce (record) each scale separately
- Ensure you record .wav files at 48kHz and 24bit (or 32bit)
- Label each scale clearly

**♩ = 60**
